Introduction

Our goal is to answer a simple question: What would happen if we dared to challenge the biggest cryptocurrencies in the world? We have witnessed time and time again how meme cryptocurrencies garner billions of dollars in market capitalization. But what if this time, it were us instead of some other entity?

That's precisely why we created this project. We envision a future where our meme coin cryptocurrency not only competes but thrives among the giants of the digital currency realm. As pioneers in this space, we are driven by the ambition to disrupt the status quo and redefine the possibilities within the cryptocurrency market.

Cryptocurrencies have revolutionized the financial landscape, offering decentralized and borderless transactions, but they often lack the playful and community-driven spirit found in meme coins. With our project, we aim to bridge this gap by combining the innovative technology of blockchain with the viral appeal and collective enthusiasm of meme culture.

As we start this journey, we strongly believe that the future of money will be shared among everyone, not controlled by a few. Our funny-money digital currency isn't just about money; it's about giving people control over their finances, letting them express themselves, and opening up endless opportunities.

Join us as we challenge the norms, redefine the rules, and pave the way for a new era of cryptocurrency innovation. Together, we can make waves, inspire change, and leave a lasting mark on the world of finance. What if this is not just a dream but a reality waiting to unfold?

Why we chose Solana as our blockchain?

Solana offers several advantages that makes it a very attractive choice for creating our coin on:

Speed and Scalability: Solana is known for its high throughput and low latency, capable of processing thousands of transactions per second. This is crucial for meme coins, which often see rapid trading activity and high demand during peak times.

Low Transaction Costs: Solana's efficient architecture allows for low transaction fees, making it cost-effective for users to buy, sell, and transfer meme coins without worrying about hefty fees eating into their holdings.

Ecosystem Support: Solana has a growing ecosystem with various tools, libraries, and developer resources that make it easier to build and deploy decentralized applications, including meme coins. This supportive environment can accelerate the development process and provide access to a wide range of services.

Community Engagement: Solana has a vibrant and engaged community of developers, investors, and enthusiasts who actively contribute to the platform's growth and adoption. Launching a meme coin on Solana can help tap into this community and gain exposure among crypto enthusiasts.

Security and Reliability: Solana's proof-of-stake consensus mechanism, combined with its robust network architecture, ensures security and reliability, reducing the risk of network attacks or downtime that could jeopardize the integrity of the meme coin platform.

Overall, Solana's combination of speed, scalability, low costs, ecosystem support, and community engagement makes it a compelling choice for launching a meme coin and capitalizing on the growing popularity of the meme coin phenomenon.

Token Allocation

v1 - 4/15/2024 - BarkPaper

<https://www.barkbuks.com>

BarkBucks Tokenomics

CEX Supply: will be the tokens destined to go to centralized exchanges such as Binance, Coinbase, Kraken, etc...

150,000,000 Tokens

DEX Supply: will be the tokens destined to go to decentralized exchanges such as Jupiter, Raydium & Orca.

600,000,000 Tokens

Operational Supply: allocated to internal operations of the BARK ecosystem for actions such as signing smart contracts, deploying APP, mint NFTs...

5,000,000 Tokens

Developers: allocated to cover the financial needs for new projects within the BARK ecosystem.

10,000,000 Tokens

Marketing: allocated to fund and designed marketing campaigns and ads for the growth of the Token Ecosystem.

10,000,000 Tokens

We have revoked the ability to mint new tokens and we have also revoked the freeze authority.

The Bark Lottery

We offer a Lottery, this is a great opportunity for users to have the chance to win more BarkBucks Tokens.

How it works?

- You connect your wallet to this location:
<https://lottery.barkbuds.com>
- 1 Ticket = 10000 barks .
(This value can change based on community feedback)
- The more people participate the bigger the pool for the prize.
- You can buy unlimited tickets.
- 95% of the tokens go to the prize pool.
- 3% of the tokens get burned, goes to burning address. Making our token deflationary.
- 2% of the tokens go to a charitable organization that our community will choose on Social Media with a poll.

BarkBucks Ecosystem

We currently have our exciting Bark Lottery and we are planning on developing many other great projects in the Bark Ecosystem.

Such as:

- Bark Charity Initiative: Launching a charitable initiative where 6% of the tokens of our total token supply will be donated to charities that help people with disabilities reintegrate into society.
- Reward the people that share our coin in social media during our early stages.
- Build a place where people will mint their own NFT memes and we will publish them.
- Create a meme contest with people's creations.
- Developing a second Lottery in Solana.

Conclusion

We made Barkbucks because we wanted to be part of the fun world of meme cryptocurrencies and see what we could achieve. Meme currencies, like Dogecoin, have shown they can be really popular and valuable. So, we thought, why not join in?

With Barkbucks, we wanted to bring some humor and community spirit to the world of digital money. We figured it could be a cool way for people to get involved in a new kind of financial system.

Taking on the big dogs of cryptocurrency with Barkbucks is a big challenge, but it's also pretty exciting. While big cryptocurrencies like Bitcoin rule the market, meme coins have shown they can shake things up too.

If Barkbucks were to challenge the big guys and succeed, it would mean a lot. It could get a ton of people interested, become really popular, and even change how cryptocurrencies work. It wouldn't just be about money –it'd be a whole cultural thing, mixing humor and community with finance.

By taking on the challenge with Barkbucks, we're diving into a world of creativity, new ideas, and people power. Whether we hit the jackpot or face some bumps along the way, we're excited to see where this adventure takes us and how meme currencies like Barkbucks could shape the future of money.

This document is regularly updated, and the information contained herein is accurate at the time of publication. However, it's important to note that the content does not constitute investment advice, financial guidance, trading suggestions, or any similar form of advice. Therefore, it should not be treated as such. The BarkBucks team advises individuals to conduct their own thorough research and seek advice from a financial advisor before making any investment decisions. When purchasing any BarkBucks product, you acknowledge that you are not acquiring a security or investment, and you release the team from any liability for potential losses or taxes. Additionally, you agree that the products are provided on an "as is" basis, and the team is not obligated to offer support or services. There should be no expectation of receiving any form of assistance from the BARK Ecosystem and its team. While BarkBucks operates as a community-driven DeFi ecosystem and is not a registered digital currency, the team strongly advises residents in areas where cryptocurrency is banned by the government to refrain from purchasing it, as the team cannot guarantee compliance with local regulations. It is essential to ensure compliance with your jurisdiction's laws and regulations before making any purchases.
